Food web activity

- Select seven students to come up and help demonstrate. 1.
- Give each student one picture to hang around their neck. 2.
- Give out nine pieces of string to the rest of the students. 3.
- Discuss, with the students, the relationships between the elements in the food web. 4.
- Get the students with the string to join up the correct elements to one another, 5. with the help of the rest of the class.
- 6. Ask one person in the web to sit down, then discuss how this would have a knock-on effect on the other elements of the system.
- Remove oysters and discuss as a class what would happen. 7.
